Graded Assignment (DevOps)

Project Name: Hello DevOps

Problem Statement:

You are required to create a basic spring Boot project that print "Hello Dev-Ops"

Questions:

Perform the following steps

a) Push all the code files to you git repository (name -> DevOpsGraded)

b) Configure Jenkins, execute the project and get the output displayed on the **Jenkins console**.

Instructions:

I) Do **not** add web dependency in your spring Boot project.

II) Name your git repository "**DevOpsGraded**"

III) Execute all the necessary steps/commands required to get the output on the Jenkins console

Submission Guidelines:

Paste the screenshot of Jenkins console output while submitting the code.
